ONE-STOP SHOP FOR BUSINESS REGISTRATION

Citizen Centric Services

With this One-Stop Shop the government is further moving away from the paper-oriented processes, procedures and records management to digital, customer-focused practices and procedures that are streamlined, pursue operational efficiency and place the citizen at the center of the process of starting up a business.

Availability

The application process on the EServices Portal is available 24/7 to all applicants, following a fast and secure registration.

Technology

The web portal provides advanced functionality such as online filing of applications, e-payments, e-identities, e-signatures, automated case management and seamless data exchanges with relevant government agencies.

OSS BRINGS

- increased accessibility of public services with possibility to apply for all services 24/7 from anywhere;
- better delivery of public services to people, reduction of costs and increased commodity for applicants;
- ease of use with fast and secure registration and instant updates for application status;
- data interoperability and re-use, removing the necessity to enter the same data for every application;
- replacement and optimization of the current paper based system;
- saving time, money and environment due to reducing paper consumption;
- higher transparency and accountability of government;
- better communication between the government, the citizens and the business sector;
- improved data accuracy and security features;
